

ASSIGN for Physicians

AN ASSIGNCARE™ PRODUCT

ASSIGN for Physicians Key Benefits

- Support handoffs and continuity of care
- Better balance workloads
- Ensure safe and quality patient care
- Reduce length-of-stays
- Improve patient satisfaction
- Optimize revenue from finding missed charges
- Reduce administrative time
- Improve care team communications
- Avoid high-risk clinical practices like missed patients
- Collect and analyze individual physician performance and productivity
- Ensure best practices

“We are more organized because of ASSIGN for Physicians. It’s so much easier for our staff. It just works.”

Practice Administrator
for Top 20 Health System

Automated and intelligent patient assignment software that drives value-based care in hospital medicine

What if your patient assignment process was so *efficient* and *effective* that it completely changed how your hospital medicine department operated?

Imagine if you could:

- Automatically build **continuity** into your patient assignment process.
- Automatically **balance physician workloads** based on effort required, while still accounting for a patient’s classification, geography, and other care factors.
- Improve **physician morale** because of non-biased and equitable workloads.
- Avoid **missed patients** during busy rounding sessions from better tracking.
- Support **geographic rounding**, but still allow for maximum flexibility.
- Collect and analyze ongoing **productivity and performance data**, including an individual physician’s impact on length-of-stay (LOS).
- **Optimize revenue** from avoiding missed charges.
- Prevent **medical errors** from patients with the same last name.
- Automatically **distribute** the assignment list to all care team members — including nurses, case managers and therapists — thereby improving care collaboration.
- Eliminate lengthy email chains for **sign-outs, notes and tasks**.
- Create an accurate patient assignment list in **15 minutes**.

ASSIGN for Physicians expertly matches the right patient with the right physician by automatically pulling the census data, combining it with physician schedules, and then applying customizable protocols to create balanced and equitable assignments. Built around a rules-based “engine,” **ASSIGN for Physicians** does what can’t be done manually – intelligently process hundreds of calculations using multiple protocols so the assignment process is **faster, safer, more efficient, more balanced and fair**.

Apply best practices to patient assignments to ensure operational excellence and sustained patient satisfaction. Choose **ASSIGN for Physicians**.
