

CHARGE INFUSION

A CHARGE CARE™ PRODUCT

CHARGE INFUSION

Key Benefits

- **100% Compliance** Exactly match your billing codes with your documentation
- **100% Efficiency** Re-direct coders to more urgent areas (especially nurses)
- **Proprietary rules engine** Applies tens of thousands of coding rules
- **Completeness of Charge** Always bill for exactly what you do (including hydration)
- **ED and Infusion Centers** Works in both locations
- **New Revenue Generation** Discover underreported times, leading to increased billing

CASE STUDY

A major cancer center reduced the number of coders required to handle 130,000 infusion events from 6 to 2. In addition, the center generated \$3.4 million of new revenue in 8 months using MedAptus' CHARGE INFUSION.

Improve operations, increase revenue, cut costs, and ensure 100% compliance - with no human intervention

With its hierarchy of codes and its counterintuitive guidelines for multiple sessions, infusion therapy can be one of the most complex coding and billing environments in healthcare today.

It's often compounded by paper-based capture systems, where encounters can be miscoded (leading to compliance issues) or underreported (resulting in missed revenue).

Let's face it. Infusion coding can be a headache -- even for experienced coders.

Not anymore.

CHARGE INFUSION automatically pulls infusion encounters — including patient data, start/stop times and the drugs utilized — and runs them through a proprietary rules engine comprised of tens of thousands of rules that codifies infusion encounters into appropriate and accurate billing codes. Those codes are then sent directly to your billing system—with no human intervention.

And because the software has fully automated all of the complexities associated with infusion coding (including hierarchies), the results are 100% accurate, ensuring compliance.

The major EHRs fail to adequately address the complexities associated with infusion therapy.

Don't let infusion therapy be your achilles heel. Take control of your infusion coding and billing with **CHARGE INFUSION**.

CHARGE CARE™

CHARGE CARE is a suite of award-winning proprietary software products developed to automatically capture charges and improve charge management, including reporting and reconciliation capabilities. Developed over an 18-year period, CHARGE CARE products are robust, secure, stable and highly functional. They are also backed and supported by experienced implementation and customer service teams.

CHARGE CARE™ Product Suite

CHARGE PRO

Flagship charge capture program that rapidly documents and reconciles patient encounters for reimbursement using sophisticated rules-based system.

CHARGE INFUSION

Computer-generated infusion encounters - automatically converting start/stop times and drug data into code and sending to the billing system.

CHARGE FACILITY

Automatically, accurately and effectively capturing charges for outpatient visits.

KLAS AWARD WINNER

MedAptus named top mobile charge capture software 8 out of the past 9 years.
