

CHARGE PRO

A CHARGE CARE™ PRODUCT

CHARGE PRO Key Benefits

- Increases revenue
- Reduces charge lag
- Improves coding accuracy
- Reduces downstream denials
- Improves compliance
- Enhances reimbursements

Case Study: The Brooklyn Hospital Center

After a complete review of the different options in the marketplace, The Brooklyn Hospital Center chose MedAptus' CHARGE PRO to fully integrate its electronic charge capture into a number of different departments, including Critical Care, Dermatology, Neurosurgery, Bariatric Surgery and numerous others. After only several months of adoption by the pilot groups, TBHC saw charge capture improve by 14% in surgery and 61% in medicine.

CHARGE PRO is MedAptus' flagship charge capture program that rapidly documents patient encounters for reimbursement.

Designed as a fully flexible and scalable solution to optimize revenue, this comprehensive, yet easy-to-use application has more than 20,000 users in hospitals, multi-specialty clinics, and academic centers throughout the United States.

The application can be deployed on mobile devices and web-enabled workstations. In addition, it gives physicians unique capability to access charge capture from within your EHR during patient charting in a single sign-on mode, allowing physicians to stay in user and patient context.

KEY HIGHLIGHTS

- Easy ICD-10 code selection tools based on searches, history and frequency of usage
- Inpatient charge capture
- Management reconciliation for hospital-based providers
- Patient encounter history at the point of care
- Alerts, messaging and sign-out features enabling care team communications and sign-out
- Custom rules capability to support local payment policies
- Integrated admit and discharge notifications to patient PCPs
- Integrates with the ASSIGNCARE suite of patient assignment products

How CHARGE PRO Works

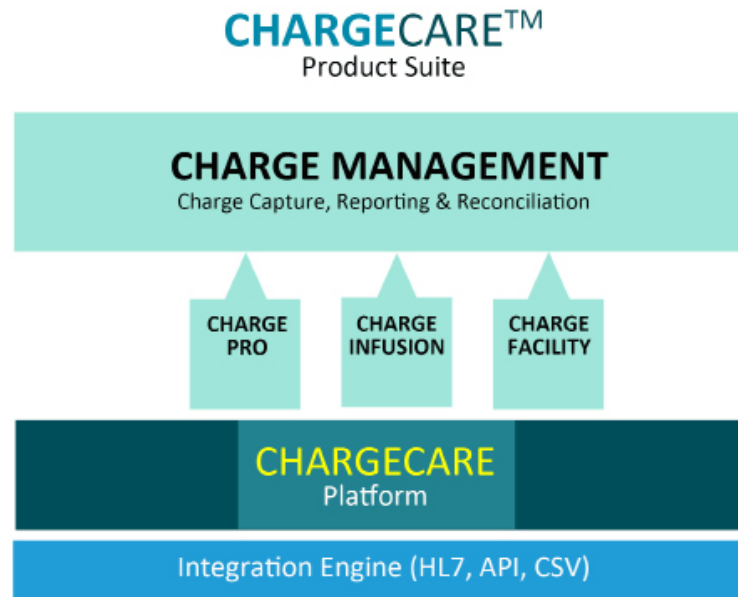

Clinician users are created in **CHARGE PRO** and associated to their specialty, specific practice locations and coding search preferences. Patient lists are populated with appropriate admission or appointment details, including relevant demographics and visit data such as hospital room and bed. As charges are created, they are assessed for compliance and the provider is alerted in real-time to any potential coding violations.

CHARGE CARE

CHARGE CARE is a suite of award-winning proprietary software products developed to automatically capture charges and improve charge management, including reporting and reconciliation capabilities. Developed over an 18-year period, the CHARGE CARE products are robust, secure, stable and highly functional. They are also backed and supported by experienced implementation and customer service teams.

CHARGE PRO

Flagship charge capture program that rapidly documents patient encounters for reimbursement. Also provides reporting and reconciliation capabilities.

CHARGE INFUSION

Computer-generated coding and billing software - automatically pulling start/stop times, converting them to code and sending codes back to billing.

CHARGE FACILITY

Automatically, accurately and effectively capturing charging for outpatient visits.

KLAS AWARD WINNER

MedAptus named top mobile charge capture software 8 out of the past 9 years.
