

CHARGE CAPTURE OPTIMIZATION ASSESSMENT - athenaOne

Are you maximizing the full revenue potential of your athenaOne investment?

Even in well-configured EHR/billing system environments, opportunities may exist to strengthen specialty-specific charge validation and reduce manual review.

medaptus enhances athenaOne with specialty-specific, rules-driven automation that ensures charges are complete, compliant, and defensible before submission.

**TALK TO AN
EXPERT**

Diagnostic Questions:

- Do providers manually enter or finalize charges at end of day?
- Are charges frequently corrected after submission?
- Do denials cite documentation-to-charge mismatches?
- Does revenue integrity rely on retrospective audits to find missed revenue?
- Do manual steps exist between documentation and claim submission?
- Do you suspect 5–10% revenue opportunity in charge capture?
- Does time to bill vary due to charge review or correction?
- Is leadership seeking margin improvement without adding FTEs?

0–2 checks: Workflows may already be well optimized.

3–5 checks: Moderate opportunity for charge capture automation.

6+ checks: High likelihood of measurable revenue and efficiency lift.
