

## QUICK DIAGNOSTIC:

# Are You at Risk of Missing Charges?

*If you answered yes to even one of these, your organization could be at risk of revenue leakage – and benefit from a more rigorous charge reconciliation approach.*

***Addressing these gaps requires a more consistent and automated approach to charge identification.***

## Diagnostic Questions:

- Do you rely on manual reviews or spreadsheets to reconcile charges?
- Have you ever discovered services documented in your EHR that were never billed?
- Are your scheduling, clinical, and billing systems not fully integrated, requiring manual data checks?
- Have payer audits or internal reviews uncovered underbilling?
- Does your finance team frequently backtrack to track down or correct missing charges?
