

Daily Snapshot

What if your patient assignments were communicated automatically?

Instant clarity, better handoffs, and fewer manual morning emails – all in one professional snapshot.

THE DAILY COMMUNICATION BURDEN IS REAL

After your assignments are automatically created, many teams still rely on manual emails, spreadsheets, or handwritten notes to get them out the door. This leads to:

- ✗ Time-consuming manual work:** Hand-typing assignment summaries and coverage details every morning.
- ✗ Inefficient handoffs:** Overnight cross-coverage context and priority notes can get lost or overlooked.
- ✗ Communication delays:** Key care team members may not receive updated assignments or patient priorities early enough.
- ✗ Hidden patient priorities:** Important indicators like new admits, consult needs, or ICU downgrades can be buried in long lists.

THAT'S WHY WE BUILT ASSIGN DAILY SNAPSHOT

- ✓ Automated Daily Summary:** No manual typing required.
- ✓ Care Team is Updated Instantly:** At-a-glance view of which patients are assigned to who and why.
- ✓ Reduce Delays in Patient Care:** Configure sections to show high-priority patients upfront (new admits, consults, ICU downgrades) so providers can prioritize their day.
- ✓ Cross-Over Notes Included:** Document overnight handoff details or priority context so teams start aligned.

“ IT'S HELPING OUR PROVIDERS PRIORITIZE WHICH PATIENTS NEED TO BE SEEN FIRST. ”

– CHAD ROBERTSON, REGIONAL DIRECTOR, OPERATIONS, TEXAS HEALTH RESOURCES

Are you leveraging all the features of **ASSIGN DAILY SNAPSHOT**?

Snapshot Features & Benefits

- ✓ **Automated Provider Coverage Summary:** Immediate view of daily provider assignments and workloads.
- ✓ **Patient Counts by Provider** See number of patients each provider will manage before rounding begins.
- ✓ **Configurable Priority Sections** Highlight patient groups that matter most – new admits, consults, discharges, ICU downgrades (customizable to you).
- ✓ **Cross-Over Notes Integration** Capture key clinical context from overnight or prior shifts.
- ✓ **Export & Distribute** Produce clean Word or PDF versions for team communication.

ASSIGN DAILY SNAPSHOT BEST PRACTICES

CUSTOMIZE THIS TO YOUR NEEDS

Decide which patient groups and indicators matter most for your morning review – new admits, consults, discharge candidates, or ICU transitions.

STANDARDIZE DAILY COMMUNICATION

Use the Snapshot as your single source of truth for morning standups, huddles, or email distribution.

ALIGN EVERY SHIFT EARLY

Make it a habit: distribute the snapshot to all care team members before rounds begin to ensure shared understanding and alignment.

VALUE PILLARS

Automated Time Savings

Eliminates manual morning documentation and reduces administrative burden.

Better Communication

Consistent, professional summaries improve clarity across care teams.

Actionable Patient Priorities

Highlights key patients so clinicians can focus where impact is highest.

Seamless Integration

Works directly within the Assign ecosystem – ready with approved assignments.
