

Hospital Medicine Analytics

What if hospital medicine leaders had real-time visibility into performance and patient flow?

Gain operational clarity, improve provider workloads, and make confident, data-driven decisions – every day.

THE ANALYTICS PROBLEM IS REAL

When performance data lives in spreadsheets and delayed EHR reports, teams often face:

Uneven workloads:

Leads to burnout risk and provider dissatisfaction.

Reactive decision-making:

Staffing and operational changes happen after issues escalate.

Poor visibility: No real-time insight into census, discharge trends, or throughput.

Hidden bottlenecks: Delays in admissions and discharges go unnoticed.

Manual reporting burden: Leaders spend hours compiling data instead of improving performance.

Real-Time Visibility:

Monitor census, admissions, discharges, and provider workload instantly.

Workload Transparency:

Track average patients per provider to ensure equitable distribution.

Performance Insights:

Analyze discharge efficiency, patient flow, and continuity metrics.

Trend & Benchmarking Data:

Use historical analytics to guide staffing and strategy.

Seamless Integration:

Built on Assign and Census Manager data for a single source of truth.

“ **HOSPITAL MEDICINE ANALYTICS** GIVES LEADERS THE CLARITY TO PROACTIVELY MANAGE OPERATIONS – NOT REACT TO YESTERDAY’S DATA. ”

Are you maximizing all the features and functionality of HOSPITAL MEDICINE ANALYTICS?

✓ **Admissions & Discharge Dashboard**
Compare inflow and outflow to monitor throughput balance.

✓ **Trend Reporting**
Analyze historical performance patterns to inform staffing models.

✓ **Provider Workload Metrics**
Track average census per provider and identify imbalances early.

✓ **Custom Reporting**
Tailored to your unique KPIs. Inquire to learn more.

✓ **Continuity of Care Insights**
Measure assigned providers per hospitalization.

HOSPITAL MEDICINE ANALYTICS BEST PRACTICES

START WITH CLEAR KPIS

Define the metrics that matter most – workload balance, discharge efficiency, or continuity.

FOLLOW A SIMPLE DAILY REVIEW FLOW

Incorporate dashboard review into morning leadership workflows.

STANDARDIZE DATA-DRIVEN DECISIONS

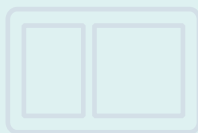

Use consistent analytics benchmarks to guide staffing and resource allocation.

VALUE PILLARS

Automated & Actionable

Transforms complex operational data into clear, visual dashboards leaders can act on immediately.

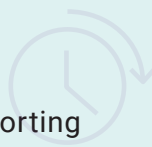

Enterprise Scale Flexibility

Supports multi-site programs and evolving operational goals.

Time Savings & Efficiency

Eliminates manual spreadsheet reporting and reduces administrative burden.

Seamless Integration

Built directly on medaptus operational data for trusted, real-time accuracy.
